Ring	SR1	Finish 640

steel
display board
42"H x 24"W x 7"Deep
wall mount

Enclosed:

- (2) 24" X 32" product spines
- (1) 24" X 42" display board
- (1) Packet of installation hardware
- (1) Packet of display product labels

Needed equipment:

- Enclosed installation hardware and drill with Phillips head drill bit or Phillips screwdriver

1. Attach spines to display board with the large screws marked **SPINE SCREWS**. Make sure that the spine drill holes (for finial on pole) are facing inward and NOT to the outside of the board.
2. Holdback installation: Attach holdback installation plates (use the #8 holdback screws) to board at its designated location. Attach holdback base plate, screw on holdback stem and screw on rosette medallion to complete holdback installation.

3. Finial Display product: Finial display products are labeled by location and product item number in the above plan-o-gram. Attach the "finials on pole pieces" to the designated location on the spine.
4. Attach Row **Q**. brackets by lining up bracket with pilot hole on board (use the #8 bracket screws) . Assemble rod with rings and finials. Row **R**. unscrew 1 bent return base plate, slide on the enclosed rings and attach base plate. Line up bent return base plate with pilot holes and attach using enclosed screws.
5. Attach enclosed display product labels to display board location of each product.
6. Display board hangers have been included to hang the assembled display board. Please install in the upper left hand and right hand corner on the back side of the board 3/4" from the outer edge of the board and 1 1/2" from the top of the board. Display should be installed securely into wall studs.
